

Georgia Electronic Conviction Processing System (GECPS)

COURT BULLETIN

This bulletin will be updated by the Georgia Department of Driver Services (DDS). Our goal is to strengthen the communication between our business partners by disseminating legislative updates and other valuable information in a timely manner.

LEGISLATIVE UPDATES

GECPS

- **What is GECPS?**

GECPS is a standardized and secure method to report GA Reportable Violation Codes to DDS according to HB1253.

- **GECPS Online Account**

The online account allows GECPS users to update contact information, review outstanding errors and access documents uploaded by DDS.

ERROR HIGHLIGHTS

2003: State Code is invalid or missing (may be an invalid state code, missing state code or unrecognized foreign country code).

Solution: Make sure the license state code field isn't blank or invalid.

Example 1: Court submits a Conviction, FTA, Withdrawal or Court Ordered Suspension with a missing state code field or invalid state code field, the court will receive error code 2003. Please verify the information entered is correct, and make sure the state code field isn't blank.

Example 2: Court submits a Conviction, FTA, Withdrawal or Court Ordered Suspension for a foreign driver with their countries information in the state code field, the court will receive error code 2003. For all foreign license holders please prefill the license state code field with AF (All Foreign) (this requirement is not included for U.S. territories, Canadian Provinces and Mexico). Please see pages 72 & 73 of the GECPS Implementation Guide for detailed information regarding state code field information.
